

Consolidated Financial Statements of TALON METALS CORP. (formerly Brazmin Corp.) For the years ended December 31, 2007 and 2006

### Management's Responsibility for Financial Information

Management has prepared the information and representations in this financial statement. The consolidated financial statements have been prepared in conformity with generally accepted accounting principles in Canada, and where appropriate, reflect management's best estimates and judgment.

Talon Metals Corp. maintains adequate systems of internal accounting and administrative controls, consistent with reasonable cost. Such systems are designed to provide reasonable assurance that relevant and reliable financial information is produced. Our independent auditors have the responsibility of auditing the consolidated financial statements and expressing an opinion on them.

The Board of Directors, through its Audit Committee, is responsible for ensuring that management fulfills its responsibilities for financial reporting and internal control. The Audit Committee is comprised of three directors. This Committee meets periodically with management and the independent auditors to review accounting, auditing, internal control and financial reporting matters.

s/Stuart Comline, President and CEO

s/Nelson Pfaltzgraff, CFO

### Auditors' Report

To the Shareholders of Talon Metals Corp.

We have audited the consolidated balance sheets of Talon Metals Corp., as at December 31, 2007 and 2006 and the consolidated statements of operations and deficit and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2007 and 2006 and the results of its operations and its cash flows for the years then ended, in accordance with Canadian generally accepted accounting principles.

See accompanying notes to consolidated financial statements.

Notes to the Consolidated Financial Statements For the years ended December 31, 2007 and 2006

### 1. Incorporation and Operations

Resource Holdings & Investments Inc. ("RHI") was incorporated on July 8, 2004 under the International Business Companies Act in the Territory of The British Virgin Islands ("BVI") to engage in the acquisition, exploration, development and operations of mineral properties in Brazil. On April 5, 2005 RHI amalgamated with Ventures Resource Corporation ("VRC"), a publicly traded company, to form BrazMin Corp. (the "Company").

The Company had a wholly-owned subsidiary, Resource Holdings 2004 Inc. ("RH 2004"), which had been incorporated in BVI on July 8, 2004. The Company together with RH 2004 owned 100% of the subsidiaries (all subsidiaries incorporated in Brazil), Brazilian Resources Mineracao Ltda. ("BRM"), Brazmin Ltda. ("BRAZ LTDA"), and EIMB - Empresa Internacional De Mineracao Brasil Ltda. ("EIMB"). The Company, through its subsidiaries, had acquired rights ranging from a 65% to 100% interest in a number of prospective gold mining projects situated in Brazil.

South American Resource Holdings Inc. ("South American") was incorporated in BVI during the previous year, and is a wholly-owned subsidiary of the Company. In the 1<sup>st</sup> quarter of 2007, BRM and BRAZ LTDA were transferred into South American so that RH 2004 owned only EIMB. RH 2004 was then sold.

On June 18, 2007, Seatrain Holdings Limited ("Seatrain") was incorporated in BVI, and is a wholly-owned subsidiary of the Company.

On July 9, 2007, the Company changed its name to Talon Metals Corp. It also changed its trading symbol on the Toronto Stock Exchange to TLO.

These consolidated financial statements include the accounts of the Company's subsidiaries. All inter-company balances have been eliminated.

#### 2. Summary of significant accounting policies

a) General –

These consolidated financial statements have been prepared by management in accordance with Canadian generally accepted accounting principles. Because a precise determination of assets and liabilities depends on future events, the preparation of financial statements for a period necessarily requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenue and expense during the period. Actual amounts could differ from these estimates. These consolidated financial statements have, in management's opinion, been properly prepared within reasonable limits of materiality and within the framework of the accounting policies summarized below.

### TALON METALS CORP. (FORMERLY BRAZMIN CORP.)

Notes to the Consolidated Financial Statements For the years ended December 31, 2007 and 2006

#### b) Estimates –

Because a precise determination of assets and liabilities depends on future events, the preparation of financial statements for a period necessarily requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenue and expense during the period. Actual amounts could differ from these estimates.

c) Cash and cash equivalents -

Cash and cash equivalents include cash and term deposits with original maturities less than three months from the date of acquisition.

d) Equipment -

Equipment is stated at cost and amortized at 20% per annum on a declining balance. One-half of the above rate is applied in the year of acquisition.

e) Mineral properties and deferred exploration costs -

Interests in mineral exploration properties are recorded at cost. Exploration expenditures, other than those of a general nature, relating to mineral properties in which an interest is retained are deferred and carried as an asset until the results of the projects are known. If a project is unsuccessful or if exploration has ceased because continuation is not economically feasible, the cost of the property and the related exploration expenditures are written off.

The cost of mineral properties includes the cash consideration and the negotiated value of shares issued on the acquisition of properties. Properties acquired under option agreements, whereby option payments are made at the discretion of the company, are recorded in the financial statements at the time payments are made. Certain option payments that management have determined are likely to be made, have been accrued in the financial statements. The proceeds from options granted on properties are credited to the cost of the related property.

Once the feasibility of a project has been established, deferred exploration expenses and other costs are segregated as deferred development expenditures. These costs are amortized over the estimated useful life of the related mineral property as commercial production commences. If the net carrying amount of the deferred exploration expenses are not recoverable, these costs are written down to net recoverable amount of the deferred exploration expense.

Although the Company believes it has taken reasonable measures to ensure proper title to its mineral properties in which it has an interest, there is no guarantee that title to any of its

Notes to the Consolidated Financial Statements For the years ended December 31, 2007 and 2006

> mineral properties will not be challenged or impaired. Third parties may have valid claims underlying portions of the Company's interests, including prior unregistered liens, agreements, transfers or claims, including native land claims, and title may be affected by, among other things, undetected defects. In addition, the Company may be unable to operate its properties as permitted or to enforce its rights with respect to its properties.

> The amounts shown for mineral properties and deferred exploration costs represents cost to date, and do not necessarily represent present or future values as they are entirely dependent upon the economic recovery of future reserves.

The Company does not accrue the estimated future costs of maintaining its mineral properties in good standing.

f) Stock based compensation -

The Company uses the accounting standard for stock-based compensation which requires the use of the fair value method for valuing stock option grants. Under this method, compensation cost attributable to all share options granted is measured at fair value at the grant date and expensed over the vesting period with a corresponding increase to contributed surplus. Upon the exercise of the stock options, consideration received together with the amount previously recognized in contributed surplus is recorded as an increase to share capital.

g) Long-term investments -

The Company's long-term investments are classified as "held-for-trading" securities and are measured at fair value. Changes in fair value are recognized in net income. Investments in securities having quoted market values and which are publicly traded on a recognized securities exchange are recorded at values based on the current bid prices.

h) Asset retirement obligation -

An asset retirement obligation is a legal obligation associated with the retirement of long-lived assets that the company is required to settle.

The Company recognizes the fair value of a liability for an asset retirement obligation in the year in which it is incurred, when a reasonable estimate of the fair value can be made. The carrying amount of the related long-lived asset is increased by the same amount as the liability. The Company does not have any significant asset retirement obligations for the years presented.

i) Income taxes -

Income taxes are accounted for using the liability method under which future tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Future tax assets and liabilities are measured using the substantively enacted tax rates expected to apply to taxable income in the years in which those temporary differences

Notes to the Consolidated Financial Statements For the years ended December 31, 2007 and 2006

are expected to be reversed. The effect on future tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the date of substantive enactment. In assessing future tax assets, the Company considers whether it is more likely than not some portion or all of the future income tax asset will be realized and whether a valuation allowance is required.

j) Foreign currency translation -

The functional currency of the company is Canadian dollars. A portion of the Company's transactions are denominated in United States dollars and Brazilian reals. The Company's foreign subsidiaries are integrated operations and financial statements stated in foreign currencies are translated using the temporal method. Monetary assets and liabilities denominated in United States dollars or Brazilian reals are translated to Canadian dollars at the rate in effect at the balance sheet date. Non-monetary items are translated at historical rates. Revenue and expenses are translated at average rates prevailing in effect during the year. The resulting gain or loss is included in the statement of operations.

k) Financial instruments –

The Company's financial instruments include cash and cash equivalents, accounts receivable, investments in Brazauro Resources Corporation ("Brazauro") and Beadell Resources Limited ("Beadell"), and accounts payable and accrued liabilities. The fair value of these financial instruments approximates carrying value.

I) Basic and diluted earnings (loss) per share -

The Company uses the treasury stock method to determine the dilutive effect of the share purchase warrants and the stock options. Per share amounts have been computed based on the weighted average number of common shares outstanding for the period presented. Diluted earnings (loss) per share is calculated by adjusting outstanding shares to take into account the dilutive effect of stock options and share purchase warrants.

m) Risks

The exploration and development of mineral deposits involves significant financial risks. The success of the Company will be impacted by a number of factors including financing, currency, exploration and extraction risks, political uncertainty, regulatory issues and environmental and other regulations.

Notes to the Consolidated Financial Statements For the years ended December 31, 2007 and 2006

The share price of the Brazauro and Beadell shares are subject to volatility. There can be no assurance that an active trading market for the Brazauro and Beadell shares is sustainable. The trading price could be subject to wide fluctuations in response to factors beyond the Company's control including, quarterly variations in Brazauro's and Beadell's results of operations, changes in earnings, estimates by analysts, conditions in the industry and general market or economic conditions. Such fluctuations could adversely affect the value of the Brazauro and Beadell shares held by the Company.

n) Share issue costs –

Share issue costs related to equity financing are charged directly to deficit.

o) Revenue recognition -

Revenue comprises interest income and is recognized when earned.

#### 3. Adoption of new accounting recommendations

#### Financial instruments

Effective January 1, 2007, the Company adopted CICA Handbook Section 1530, Comprehensive Income, CICA Handbook Section 3855 ("Section 3855"), Financial Instruments—Recognition and Measurement, and CICA Handbook Section 3865, Hedges. These new standards contain comprehensive requirements for the recognition and measurement of financial instruments, the treatment of financing costs and the application of hedge accounting. CICA Handbook Section 1530 also introduces a new component of equity referred to as comprehensive income. The adoption of the new standards had no impact on the consolidated financial statements as at January 1, 2007.

The Company has assessed new and revised accounting pronouncements that have been issued that are not yet effective, and determined that the following may have an impact on the Company:

As of January 1, 2008, the Company will be required to adopt two new CICA standards, Section 3862, "Financial Instruments – Disclosures" and Section 3863, "Financial Instruments Presentation", which will replace Section 3861, "Financial Instruments – Disclosure and Presentation". The objective of Section 3862 is to provide disclosures that will help users to evaluate the significance of financial instruments on the Company's financial position and performance. It places an increased emphasis on disclosures about risks associated with both recognized and unrecognized financial instruments and how these risks are managed. The new disclosure standard will increase the Company's disclosure regarding the risks associated with financial instruments and how those risks are managed.

As of January 1, 2008, the Company will be required to adopt CICA Handbook Section 1535, "Capital Disclosures", which will require the Company to disclose its objectives, policies and processes for managing capital. This disclosure will also include summary quantitative data about what the Company manages as capital and information as to whether the Company has complied with any externally imposed capital requirements. Section 1535 requires additional disclosure, but is not expected to have a significant impact on the Company's financial statements.

Notes to the Consolidated Financial Statements For the years ended December 31, 2007 and 2006

> As of January 1, 2008, the Company will be required to adopt CICA Handbook section 1400, "Going Concern", which requires management to make an assessment of the Company's ability to continue as a going concern after taking into account information concerning, as a minimum, the next twelve months. When management is aware of material uncertainties that may cast significant doubt upon the Company's ability to continue as a going concern, management is obliged to disclose these uncertainties. The adoption of the changes to section 1400 is not expected to have an impact on the Company's financial statements.

#### 4. Cash and cash equivalents

5.

Cash and cash equivalents are comprised as follows:

	<u>2007</u>	<u>2006</u>
Cash on hand and balances with banks	\$190,438	\$215,721
Short term investments	14,409,258	11,223,436
	\$14,599,696	\$11,439,157
Equipment		
	<u>2007</u>	2006
Cost	\$116,294	\$92,866
Accumulated Amortization	<u>28,160</u> \$88,134	<u> </u>

#### 6. Mineral properties and deferred expenditures

The properties on which the Company's subsidiaries carry out exploration and development activities are located in Brazil. The mineral properties and deferred exploration expenditures are comprised as follows:

Notes to the Consolidated Financial Statements For the years ended December 31, 2007 and 2006

### Name of Project

	<u>2007</u>	<u>2006</u>
BRM		
São Jorge Project	\$5,446,087	\$5,114,914
BRAZ LTDA		
Água Branca Project Campo Grande Project Tartarugalzinho Project Other Projects	1,900,633 740,485 - 710,190	893,784 359,822 583,790 474,368
EIMB		
Tocantinzinho Project		744,214
	\$8,797,395	\$8,170,892

### a) São Jorge Project -

On July 16, 2004 the Company entered into an agreement whereby BRM acquired a 100% interest in São Jorge exploration license and mineral rights located in Pará State, Brazil, within the Tapajós Gold District, from Centaurus Resources Ltd ("Centaurus"). The license has an initial term of three years from the date of publication of the license on March 2, 2003. An application for the extension of the license for a second term of three years was submitted to the Departamento Nacional de Produção Mineral ("DNPM") in December 2005.

On April 22, 2005 the Company entered into an agreement with Jaguar Resources do Brasil Ltda whereby Talon acquired a 100% interest in three adjacent claims in the São Jorge area. On May 13, 2005 an agreement was made with Tapajós Mineração and a Mr. Pacheco whereby Talon acquired a 100% interest in certain adjacent claims within the São Jorge area. One of the vendors of the latter claims is entitled to receive a bonus at the time the project reaches development stage. The bonus amount corresponds to 1% of the proven mineable reserves as demonstrated by a feasibility study relating to the São Jorge area. This study should be prepared in accordance with internationally accepted practices and be compliant with NI 43-101. This 1% bonus is purchasable by the Company on or before September 30, 2006 for an amount of US \$2,500,000. Talon has elected not to exercise the purchase of this bonus. In addition, cash option payments totaling USD \$440,000 were payable, all of which have been made. One of the acquired properties has a residual royalty amounting to 2% of gross proceeds from any mining operation, 1.5% of which is purchasable at any time for US\$500,000. The total area of São Jorge including all the above is 57,420 hectares.

Notes to the Consolidated Financial Statements For the years ended December 31, 2007 and 2006

On May 5, 2006, the Company issued a press release in respect of certain alleged irregularities affecting Licence #024, being one of the licences that were obtained from Centaurus in 2004. Talon has received a document from the Brazilian DNPM, dated August 7, 2006, indicating that in the event that any such alleged irregularity should result in Licence #024 being nullified by the DNPM, then Licences #058 and #275, each owned 100% by the Company, will prevail and be granted priority rights over the São Jorge deposit and a large area surrounding such deposit.

### b) Água Branca Project -

On July 16, 2004 the Company acquired through BRAZ LTDA, a 100% interest in the underlying mineral rights of Água Branca, a 9,356 hectare property, located in Pará State, Brazil within the Tapajós Gold District, from an independent vendor and Centaurus. These licences have been converted to exploration licences and transferred into the name of Brazmin Ltda. Eight payments totaling approximately US\$76,000 have already been made to the vendors. A further option payment of approximately US\$74,000 is due in March 2008 (included in mineral properties and accounts payable); and a final option payment of US\$150,000 is due in March 2009. The property area is subject to a 2% net smelter return royalty, with a buy out for US\$2,000,000.

In September 2006, a Talon subsidiary signed option agreements to acquire a 100% interest in an additional 7,725 hectares. Staggered option payments are payable in respect of these areas.

This brings the total area at Água Branca to 17,081 hectares. The Company is currently negotiating to acquire additional land contiguous to the main Água Branca block.

### c) Campo Grande Project –

The Campo Grande project is located in the Iron Quadrangle gold camp, approximately 110 km west of Belo Horizonte, the capital of Minas Gerais State, Brazil. This project consists of three exploration licences covering 2,611 hectares, which are owned 100% by Company subsidiaries. A net smelter royalty ("NSR") of 1.5% is held by a third party on one of the three licenses.

### d) Tartarugalzinho ("Little Turtle") Project -

In 2005, the Company purchased an option to acquire a 100% interest in the 9,602 hectare Tartarugalzinho Gold Project ("Little Turtle") from an independent third party. There is an underlying royalty of 1.2% payable to the independent third party, purchasable for US\$1 million. Under the terms of the agreement, the Company agreed to make annual payments of US\$100,000 until the commencement of commercial production. Little Turtle is located in Amapá State, Brazil.

During the third quarter of 2007, the Company entered into an agreement to assign its option to acquire a 100% interest in this project to Beadell, a company which completed an Initial Public Offering on the Australian Stock Exchange ("ASX") on September 26, 2007. Under the terms of the agreement the Company received a total of US\$650,000 in cash and shares from Beadell. A realized gain of \$88,219 has been recorded in respect of this sale. Under ASX regulations, the shares in Beadell are held in escrow by the exchange for a period of twelve months from the date of listing. The Beadell shares are registered in the name of Seatrain.

As Little Turtle is now owned and operated by Beadell, no further expenditures are contemplated by the Company for this property.

Notes to the Consolidated Financial Statements For the years ended December 31, 2007 and 2006

### e) Other Properties

The Company owns or has interests in several Other Properties in Brazil.

The Serrita and Serrita Norte Project are two adjoining parcels located in Pernambuco State, Brazil (together the "Serrita Project"). BRAZ LTDA currently owns a 65% interest in the Serrita Project. The Company has decided to farm-out this project as it does not constitute a core asset. On February 8, 2006, the Company entered into an option agreement with Troy Resources NL ("Troy") of Australia. Troy has the right to up to a 75% interest in the Serrita project by spending US\$700,000 over 4 years and making certain cash payments to the Company and its partners. Should Troy earn its 75% interest, the Company may retain a 16.25% interest or elect to convert to a NSR royalty. The Company has been advised by Troy of its intention to conduct an initial drill test at the Serrita Project in 2008.

The Company decided to discontinue its' work on the Terra Nova Project. As such an amount of \$40,700 was written down to reduce this project to a zero value in 2007.

The Rio Maria Project ("Rio Maria") consists of five exploration licence applications covering 43,379 hectares in the name of Brazmin Ltda. and located in southeastern Pará State. The Company determined that the Rio Maria did not meet the current corporate objectives and a decision was made to farm the project out. As such, an amount of \$62,405 was written down to reduce this project to a zero value in 2007.

During the year, Brazmin Ltda. entered into an agreement with Reinarda Mineracao Ltda. ("Reinarda"), a Brazilian subsidiary of Troy, regarding Rio Maria. Under the terms of the agreement Reinarda can earn a 51% interest in Rio Maria by paying Brazmin Ltda. a total of US\$150,000 and making expenditures of US\$100,000 over twelve months. Reinarda can then increase their ownership of Rio Maria to 100%, with a 2% NSR royalty payable to Brazmin Ltda., by making an additional US\$200,000 payment and further expenditures totaling US\$250,000 over the next 24 months. One half of the 2% NSR (i.e. 1%) can be purchased by Reinarda for a one time payment of US\$1,000,000. The Company has been informed of Troy's intention to commence exploration of Rio Maria as soon as is practicable.

The Batistão Gold Project comprises a 20,000-hectares property, which is 100% owned by Brazmin Ltda. The project was secured by Talon in 2007 and is located on the Peixoto de Azevedo Mineral Province on the northern portion of Mato Grosso State, Brazil.

The Company also signed a binding letter of interest with Sagitario Servicos Minerais S/C Ltda ("Sagitario") to acquire a 100% interest in the Barra do França Gold Project ("Barra do França") located in the northeastern region of Brazil. In terms of the agreement, the Company has already paid USD \$15,000 to secure the option on Barra do França and conduct a due diligence review. USD \$85,000 is payable on May 11, 2008; and a final USD \$150,000 is payable on February 11, 2009 to acquire a 100% interest in the project. In addition, Sagitario will retain a royalty of 1% net smelter return, which can be acquired by the Company at any time through the payment of USD \$500,000. The Company has the right to withdraw from this agreement at any time.

Notes to the Consolidated Financial Statements For the years ended December 31, 2007 and 2006

#### f) Tocantinzinho Project -

On September 13, 2006, Talon announced that an agreement had been reached whereby Brazauro Resources Corporation ("Brazauro") (TSX-V:BZO) would acquire all of Talon's interests in the Tocantinzinho Gold Project ("Toc") in exchange for 13,150,000 treasury shares of Brazauro. The acquisition agreement was effected on February 7, 2007. Pursuant to this agreement, the Company entered into a voting trust and placement rights agreement (the "Placement Rights Agreement") with Brazauro, which is filed on SEDAR and available at www.sedar.com.

During the third quarter of 2007, Talon sold 8,214,500 common shares of Brazauro (the "Disposition") for gross proceeds of approximately \$6.5 million; this represented approximately 62% of the Company's previous share position in Brazauro. The Company continues to hold 4,935,500 common shares of Brazauro which represents about 6% of the outstanding common shares of Brazauro. In connection with the Disposition, Talon and Brazauro entered into an agreement dated September 18, 2007, pursuant to which they agreed to: (1) terminate the Placement Rights Agreement; and (2) that, for a period of six months after the date of the Disposition, Talon will not sell, transfer, assign or complete any other transaction which alienates, or could have the effect of alienating, any of the remaining 4,935,500 common shares of Brazauro held by Talon. These remaining Brazauro shares continue to be designated as "held for trading" and the Company will continue to review this position on a regular basis, with a view to maximizing shareholder value.

As Toc is now owned and operated by Brazauro, no further expenditures are contemplated by the Company for this property.

#### 7. Investments

Investment in Brazauro	\$2,566,460	\$-
Investment in Beadell	759,366	-
	\$3,325,826	\$-

<u>2007</u>

The Company received 2,450,000 shares in Beadell on the sale of the Little Turtle project. The Beadell shares have been valued at the closing bid price of the shares as of December 31, 2007. An unrealized gain of \$227,336 has been recognized in net income for the year ended December 31, 2007.

During the third quarter of 2007, the Company sold 8,214,500 common shares of Brazauro (the "Disposition") for gross proceeds of approximately \$6.5 million (a realized gain of \$164,205) ; this represented approximately 62% of its previous share position in Brazauro. The Company continues to hold 4,935,500 common shares of Brazauro which represents about 6% of the outstanding common shares of Brazauro. These remaining shares in Brazauro have been recorded at the closing bid price of its shares of \$0.52, as of December 31, 2007. An unrealized loss in the amount of \$1,233,875 has been recognized in net income for the year ended December 31, 2007. In connection with the Disposition, the Company and Brazauro entered into an agreement dated September 18, 2007, pursuant to which they agreed to: (1) terminate the

2006

Notes to the Consolidated Financial Statements For the years ended December 31, 2007 and 2006

Placement Rights Agreement; and (2) that, for a period of six months after the date of the Disposition, the Company will not sell, transfer, assign or complete any other transaction which alienates, or could have the effect of alienating, any of the remaining 4,935,500 common shares of Brazauro held by the Company.

#### 8. Share capital and warrants

The Company has an unlimited number of authorized voting common shares.

	Number of shares	Number of Warrants	Amount
Balance, December 31, 2005	20,817,074	4,681,671	\$13,399,767

Balance, December 31, 2007	27,054,222	2,500,000	\$23,932,221

The fully diluted share capital of the Company is 31,894,722 common shares.

This is comprised of the shares and warrants as above as well as the options as mentioned below.

#### Stock Options

a) During the third quarter of fiscal 2007, the Company issued a total of 415,000 stock options to certain of its officers and employees. The options expire in August 2012 and vest over a period of 24 months, 25% vesting each 6 months from August 2007. 50,000 of the above options have an accelerated vesting, so the first vesting period is October 18<sup>th</sup>, 2007 and every six months thereafter. The exercise price is \$1.00 per share. All these options, other than 50,000 of them which were forfeited in the fourth quarter, are outstanding as at December 31, 2007.

#### Estimated fair value of stock options

The Company determined the fair value of the 415,000 stock options issued using the<br/>Black-Scholes option pricing model under the following assumptions:Expected life5 yearsFair value (\$/option)\$0.80Risk-free interest rate4.30%Volatility110%Dividends0%

Notes to the Consolidated Financial Statements For the years ended December 31, 2007 and 2006

b) During the second quarter of fiscal 2007, the Company issued a total of 300,000 stock options to its officers. The options expire in April, 2012 and vest over a period of 18 months, 33% vesting each 6 months from April 2007. The exercise price is \$0.98 per share. All these options, other than 250,000 forfeited during the fourth quarter, are outstanding as at December 31, 2007.

#### Estimated fair value of stock options

The Company determined the fair value of the 300,000 stock options issued using the Black-Scholes option pricing model under the following assumptions:

Expected life	5 years
Fair value (\$/option)	\$0.76
Risk-free interest rate	4.30%
Volatility	102%
Dividends	0%

c) During the last quarter of fiscal 2006, the Company issued a total of 200,000 stock options to its directors. The options expire in December, 2011 and are exercisable at any time. The exercise price is \$1 per share. All these options are outstanding as at December 31, 2007.

#### Estimated fair value of stock options

The Company determined the fair value of the 200,000 stock options issued using the Black-Scholes option pricing model under the following assumptions:

Expected life	5 years
Fair value (\$/option)	\$0.73
Risk-free interest rate	3.80%
Volatility	93%
Dividends	0%

Notes to the Consolidated Financial Statements For the years ended December 31, 2007 and 2006

d) During the second quarter of fiscal 2006, the Company issued a total of 437,500 stock options to its directors, officers and consultants. The options expire on May 31, 2011 and are exercisable at any time, except for 50,000 options which vest over a period of 18 months. The exercise price is \$2 per share. 203,500 of these options are outstanding as at December 31, 2007.

Estimated fair value of stock options

The Company determined the fair value of the 437,500 stock options issued using the Black-Scholes option pricing model under the following assumptions:

Expected life	5 years
Fair value (\$/option)	\$1.25
Risk-free interest rate	4.30%
Volatility	72%
Dividends	0%

A summary of options outstanding as at December 31, 2007 and 2006 and changes during the periods ended on those dates is presented below:

		2007		2006
	Options	Weighted Average Exercise Price	Options	Weighted Average Exercise Price
Outstanding – beginning of year	2,452,500	\$1.36	1,815,000	\$1.25
Granted	300,000	0.98	437,500	2.00
Granted	415,000	1.00	200,000	1.00
Forfeited	(320,000)	1.25	-	-
Forfeited	(207,000)	2.00	-	-
Forfeited	(250,000)	0.98		
Forfeited	(50,000)	1.00		
	2,340,500	\$1.10	2,452,500	\$1.36
Exercisable – end of year	1,942,167	\$1.31	2,419,170	\$1.35

Notes to the Consolidated Financial Statements For the years ended December 31, 2007 and 2006

The total potential proceeds to the Company should all outstanding options be exercised would be \$2,578,750.

#### Warrants

On February 10, 2006, the Company issued 5,000,000 units at \$2 per unit by way of private placement. Each unit consists of one common share and one-half of one common share purchase warrant. Each full warrant entitled the holder to purchase one common share of the Company at a price of \$2.75 until February 10, 2008. None of these warrants were exercised by the expiry date of February 10, 2008. Warrants were also issued to the private placement brokers at a rate of 6% of the total number of units issued ("Compensation Warrants"). These warrants were exercisable within 12 months at a price of \$2.13, or an amount agreed by the Toronto Stock Exchange. These warrants expired on February 10, 2007.

### Estimated fair value of warrants

The Company determined the value of \$171,910 for the February 10, 2006 warrants issued to the brokers using the Black-Scholes option pricing model under the following assumptions:

Fair value (\$/option)	\$0.57
Risk-free interest rate	3.90%
Expected life (years)	1
Volatility	67%
Dividends	0%

These 300,000 warrants had an expiry date of February 10, 2007 and upon expiry, the amount of \$171,910 was transferred to Contributed Surplus.

#### **Contributed Surplus**

A summary of contributed surplus is as follows:

Balance – December 31, 2005 Options granted in 2006	\$931,827 651,462
Warrants expired unexercised in 2006	1,109,363
Balance – December 31, 2006	2,692,652
Warrants expired unexercised in 2007	171,910
Options granted in 2007	290,826
Options forfeited and unvested in 2007	(35,450)
Balance – December 31, 2007	\$3,119,938

Notes to the Consolidated Financial Statements For the years ended December 31, 2007 and 2006

### 9. Earnings (loss) per share

The following table sets forth the computing of basic and diluted earnings (loss) per share:	2007	2006
Numerator for basic and diluted earnings (loss) per share available to common shareholders	\$6,753,593	\$(1,976,205)
Denominator for basic earnings (loss) per share	27,054,222	26,122,343
Share Purchase Options	6,212	-
Warrants		
Denominator for diluted earnings (loss) per share	27,060,434	26,122,343
Basic & diluted earnings (loss) per share	\$0.25	\$(0.08)

### 10. Income taxes

As the Company is incorporated under the International Companies Business Act, it is exempt from tax in the British Virgin Islands. The Brazilian subsidiaries have loss carry forwards of \$158,232 which are available to shelter future taxable income. These losses have no expiry date but can only be offset against taxable income to the extent of 30% in any given year.

The Company has taken a full valuation allowance against the future tax asset relating to these losses, and accordingly, no future income tax asset has been recognized in these financial statements.

The difference between the expected tax recovery at statutory rates and the actual tax recovery of \$nil, is due to the tax effect of losses not booked, and the exempt status.

Notes to the Consolidated Financial Statements For the years ended December 31, 2007and 2006

### 11. Related party transactions and balances

The Company has entered into an administrative service agreement (the "Agreement") with Tau Capital Corp. ("Tau"). The controlling shareholder of Tau is a 6% shareholder of the Company. The Agreement was to terminate on July 31, 2007, but automatically renewed on the same terms and conditions for a further one year period. The terms of the Agreement require the Company to pay Tau a monthly service fee of \$22,500. For the year ended December 31, 2007 fees paid to Tau for these services were \$270,000 (2006: \$270,000).

Consulting fees paid to officers of the Company for the year ended December 31, 2007 were \$295,955 (2006:\$250,873). In addition an amount of \$66,047 (2006:\$NIL) was charged to the Company by Tau in respect of services rendered outside of the management agreement.

Accounts receivable and other assets include \$22,500 paid to Tau for management fees for January 2008 (December 31, 2006: \$22,500).

These transactions were in the normal course of operations and were measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

#### 12. Geographic information

Revenue of the Company is attributable to the British Virgin Islands. All of the Company's equipment and mining properties are located in Brazil.
