

Talon Metals Corp

165 N Warren Street

Tamarack, MN 55787

Position: Senior Mining Engineer - Underground

Location: Tamarack, MN

Position Type: Permanent

Schedule: Full-time

Start date: ASAP

Contact: Alta at HR@talonmetals.com

The Opportunity

Talon Metals Corp has a position for a passionate Senior Mining Engineer - Underground reporting to VP Mine Engineering. This is a great opportunity to make a significant contribution towards the development of the high-grade nickel-copper-cobalt project in Tamarack, Minnesota.

Responsibilities

- Develop and manage the underground mine design and schedule
- Perform engineering studies with a focus on optimization and innovation
- Collaborate with site exploration, geotech and process teams in order to deliver a cohesive plan with a common goal
- Coordinate work by suppliers and consultants

Qualifications

- Bachelor's Degree in Mining Engineering
- Minimum 5 years' experience in Underground mining
- Proficiency in mine planning software, preferably Deswik®
- At least 3 years long range planning
- Advanced knowledge of mine equipment, ore flow systems, ventilation or rock mechanics considered an asset
- Some underground operational experience preferred
- Ability to work with minimal supervision
- Ability to work in the USA or Canada without sponsorship

Benefits

- Small team = large contribution. You will have the ability to make significant contributions that will have lasting effects
- Flexible work arrangements, work at site or from home with periodic travel to site
- Competitive salary with benefits and stock options
