

BUILDING A SECURE, LOW COST, GREEN NICKEL™ USA DOMESTIC SUPPLY CHAIN FROM MINE TO BATTERY: THE SMART WAY

TALON METALS CORP. (TSX:TLO)
RIO TINTO (KENNECOTT EXPLORATION COMPANY) JOINT VENTURE
April 2021

CONDITIONS OF PRESENTATION/FORWARD LOOKING STATEMENTS

This presentation has been prepared by Talon Metals Corp. (“**Talon**” or the “**Company**”) and is being delivered for informational purposes only. The information contained herein may be subject to updating, completion, revision, verification and further amendment. Except as may be required by applicable securities laws, Talon disclaims any intent or obligation to update any information herein, whether as a result of new information, future events or results or otherwise. Neither Talon nor any of its shareholders, directors, officers, agents, employees or advisers take any responsibility for, or will accept any liability whether direct or indirect, express or implied, contractual, tortuous, statutory or otherwise, in respect of the accuracy or completeness of the information or for any errors, omissions or misstatements or for any loss, howsoever arising from the use of this presentation.

This presentation should not be considered as the giving of investment advice by Talon or any of its shareholders, directors, officers, agents, employees or advisors. Each person to whom this presentation is made available must make its own independent assessment of Talon after making such investigations and taking such advice as may be deemed necessary. In particular, any estimates or projections or opinions contained herein necessarily involve significant elements of subjective judgment, analysis and assumption and each recipient should satisfy itself in relation to such matters. Neither the issue of this presentation nor any part of its contents is to be taken as any form of commitment on the part of Talon to proceed with any transaction and Talon reserves the right to terminate any discussions or negotiations with prospective investors. In no circumstances will Talon be responsible for any costs, losses or expenses incurred in connection with any appraisal or investigation of Talon.

This presentation does not constitute, or form part of, any offer or invitation to sell or issue, or any solicitation of any offer to subscribe for or purchase any securities in Talon, nor shall it, or the fact of its distribution, form the basis of, or be relied upon in connection with, or act as any inducement to enter into, any contract or commitment whatsoever with respect to such securities.

This presentation contains certain “forward-looking statements”. All statements, other than statements of historical fact that address activities, events or developments that Talon believes, expects or anticipates will or may occur in the future are forward-looking statements. These forward-looking statements reflect the current expectations or beliefs of Talon based on information currently available to Talon. Such forward-looking statements include, among other things, statements relating to future exploration potential at the Tamarack North Project; the Company’s investigations into producing battery-grade nickel sulphate from Tamarack nickel concentrate; the Company’s expectations with respect to the electric vehicle and related battery market; the Company’s expectations of demand for Nickel, supply of nickel and the price of nickel; the Company’s expectations concerning ongoing and future metallurgical test work; the Company’s goal produce Green-Nickel; the Company’s expectations with respect to its financial resources, royalties, and targets, opex, capex, goals, NPV, objectives and plans and the timing associated therewith.

Forward-looking statements are subject to significant risks and uncertainties and other factors that could cause the actual results to differ materially from those discussed in the forward-looking statements, and even if such actual results are realized or substantially realized, there can be no assurance that they will have the expected consequences to, or effects on Talon. Factors that could cause actual results or events to differ materially from current expectations include, but are not limited to: changes in commodity prices, including nickel; the Company’s inability to raise capital and/or pay Kennecott Exploration Company pursuant to the Option Agreement dated November 7, 2018 (and the amendments thereto); the lack of electric vehicle adoption or in the event of such adoption, such not resulting in an increased demand for nickel or there being a nickel deficit; negative metallurgical results; changes in interest rates; risks inherent in exploration results, timing and success, including the failure to identify mineral resources or mineral reserves; the uncertainties involved in interpreting geophysical surveys (including DHEM, MMR, Surface EM, RIM), drilling results and other geological data; inaccurate geological and metallurgical assumptions (including with respect to the size, grade and recoverability of mineral reserves and mineral resources); uncertainties relating to the financing needed to further explore and develop the Tamarack North Project or to put a mine into production; the costs of commencing production varying significantly from estimates; unexpected geological conditions; changes in power prices; unanticipated operational difficulties (including failure of plant, equipment or processes to operate in accordance with specifications, cost escalation, unavailability of materials, equipment and third-party contractors, inability to obtain or delays in receiving government or regulatory approvals, industrial disturbances or other job action, and unanticipated events related to health, safety and environmental matters); political risk, social unrest, and changes in general economic conditions or conditions in the financial markets.

Any forward-looking statement speaks only as of the date on which it is made and, except as may be required by applicable securities laws, Talon disclaims any intent or obligation to update any forward-looking statement, whether as a result of new information, future events or results or otherwise. Although Talon believes that the assumptions inherent in the forward-looking statements are reasonable, forward-looking statements are not guarantees of future performance and accordingly undue reliance should not be put on such statements due to the inherent uncertainty therein.

TECHNICAL REFERENCE

The mineral resource figures disclosed in this presentation are estimates and no assurances can be given that the indicated levels of nickel, copper, cobalt, platinum, palladium and gold will be produced. Such estimates are expressions of judgment based on knowledge, mining experience, analysis of drilling results and industry practices. Valid estimates made at a given time may significantly change when new information becomes available. While the Company believes that the resource estimates disclosed in this presentation are well established, by their nature resource estimates are imprecise and depend, to a certain extent, upon statistical inferences which may ultimately prove unreliable. If such estimates are inaccurate or are reduced in the future, this could have a material adverse impact on the Company.

Mineral resources are not mineral reserves and do not have demonstrated economic viability. Inferred mineral resources are estimated on limited information not sufficient to verify geological and grade continuity or to allow technical and economic parameters to be applied. Inferred mineral resources are too speculative geologically to have economic considerations applied to them to enable them to be categorized as mineral reserves. There is no certainty that mineral resources can be upgraded to mineral reserves through continued exploration.

Please see the technical report entitled “NI 43-101 Technical Report Updated Preliminary Economic Assessment (PEA) #3 of the Tamarack North Project – Tamarack, Minnesota” with an effective date of January 8, 2021 (the “**2021 PEA**”) prepared by independent “Qualified Persons” (as that term is defined in National Instrument 43-101 (“NI 43-101”)) Leslie Correia (Pr. Eng), Andre-Francois Gravel (P. Eng.), Tim Fletcher (P. Eng.), Daniel Gagnon (P. Eng.), Volodymyr Liskovych (P. Eng.), David Ritchie (P. Eng.), Oliver Peters (P. Eng.), Andrea Martin (P.E.) and Brian Thomas (P. Geo) for information on the QA/QC, data verification, analytical and testing procedures at the Tamarack Project. Copies are available on the Company’s website (www.talonmetals.com) or on SEDAR at (www.sedar.com). The laboratory used is ALS Minerals who is independent of the Company.

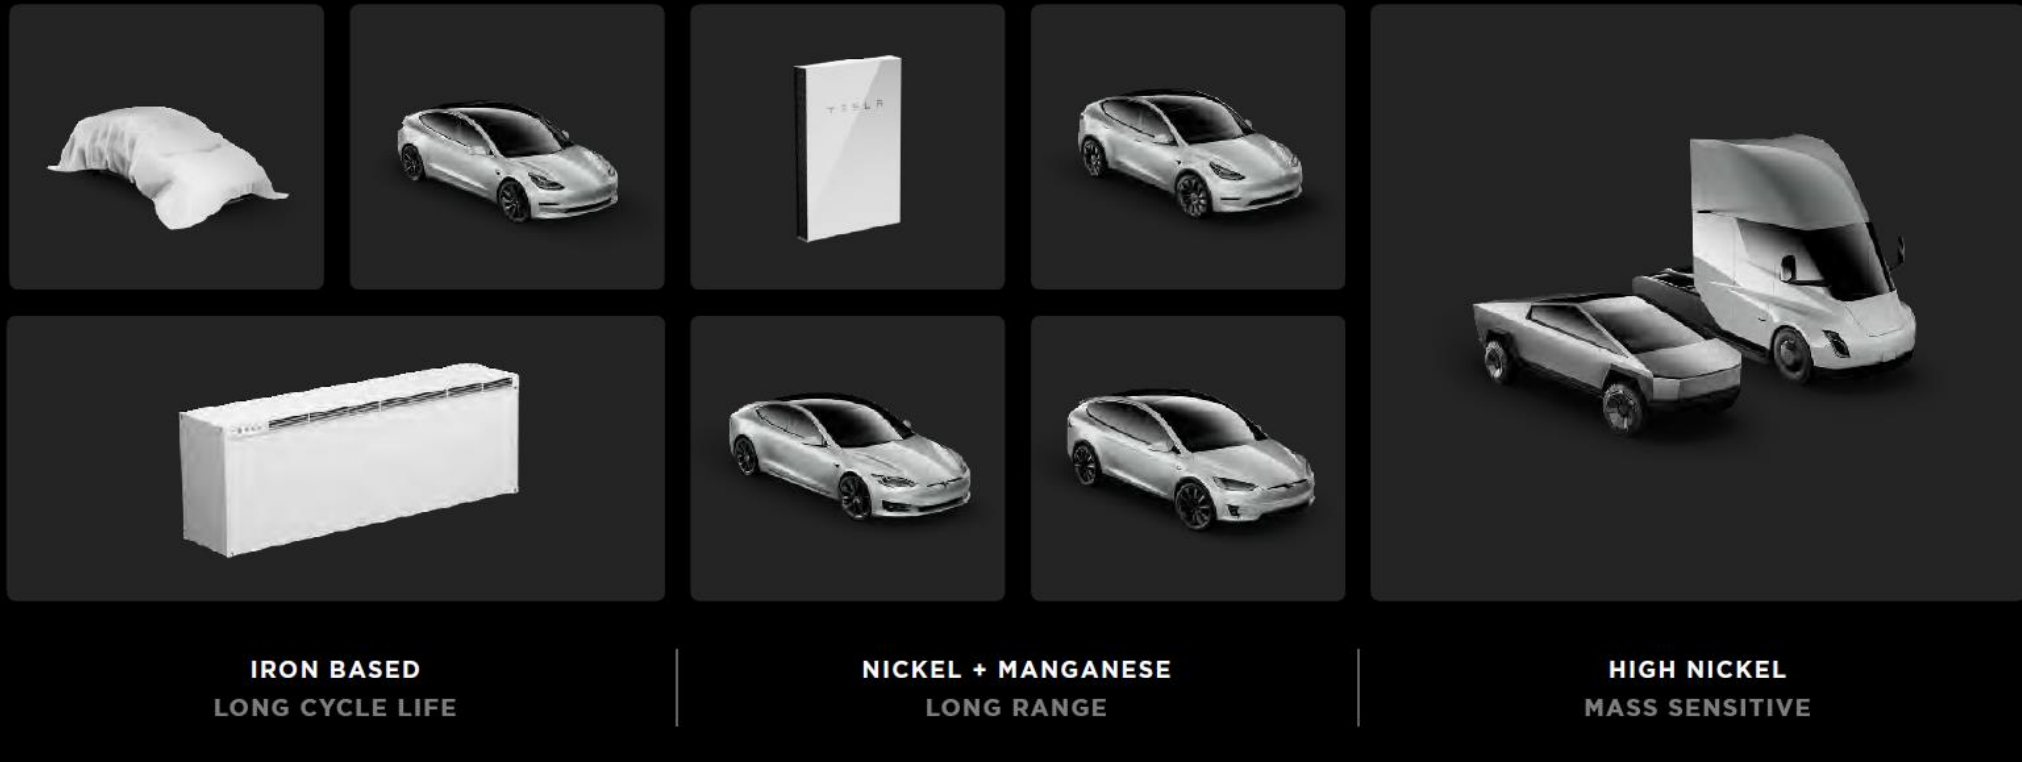

The 2021 PEA is preliminary in nature. The 2021 PEA includes inferred mineral resources. Inferred mineral resources are considered too speculative geologically to have economic considerations applied to them that would enable them to be categorized as mineral reserves. There is no certainty that the 2021 PEA will be realized.

The mineral resource estimate contained in this presentation was prepared by or under the supervision of Mr. Brian Thomas (P.Geo.), who is a geologist independent of Talon and an employee of Golder Associates Ltd. In addition, Mr. Thomas has reviewed the sampling, analytical and test data underlying such information and has visited the site and reviewed and verified the QA/QC procedures used at the Tamarack North Project and found them to be consistent with industry standards. Dr. Etienne Dinel, Vice President, Exploration of Talon, is a Qualified Person within the meaning of NI 43-101. Dr. Dinel is satisfied that the analytical and testing procedures used are standard industry operating procedures and methodologies, and he has reviewed, approved and verified the technical information in this presentation, including sampling, analytical and test data underlying the technical information.

Lengths in this presentation are drill intersections and not necessarily true widths. True widths cannot be consistently calculated for comparison purposes between holes because of the irregular shapes of the mineralized zones.

THE US WILL NEED NICKEL TO PRODUCE NICKEL BASED BATTERY CATHODE FOR LONG RANGE AND MASS SENSITIVE ELECTRIC VEHICLES

Diversified Cathode Approach

Tesla Battery Day, September 22, 2020

NEW NICKEL PRODUCTION OPTIONS OUTSIDE OF THE USA:

(1) LATERITES + HPAL: INDONESIA

“Indonesia wants to take a central position in the value-added links in the EV supply chain — from mining the ore, to refining it, to manufacturing the batteries and eventually to building the cars. And because Indonesia controls the raw input, it turns out it has a lot of leverage.”

*Indonesia plays hardball with its nickel
30 March 2021 , Author: James Guild, RSIS*

Enormous open-pit mines Indonesian mines

Very large High Pressure Acid Leach (HPAL) Indonesian facilities

NEW NICKEL PRODUCTION OPTIONS OUTSIDE OF THE USA:

(2) LATERITES + NPI + SMELTING + HYDROMET : INDONESIA

"Tsingshan, the world's largest nickel producer, announced last week that it will supply nickel matte based on converted nickel pig iron (NPI) from its operations at Indonesia Morowali Industrial Park (IMIP) to Chinese companies Huayou and CNGR Advanced Materials, which will be further processed to produce battery-grade nickel sulphate."*

Roskill March 9, 2021

The proposed feedstock (NPI) produces 4.92x the CO₂ using 3.43x the energy per contained nickel (see red box below) compared to nickel from the traditional smelting process **BEFORE** further processing (blue outline)*

**Energy Consumption and Greenhouse Gas Emissions of Nickel Products, Department of Materials Science and Engineering, Royal Institute of Technology, published 29 October 2020*

THE USA HAS BEEN PRODUCING NICKEL RESPONSIBLY SINCE 2013: *FOR A CANADIAN NICKEL SMELTER*

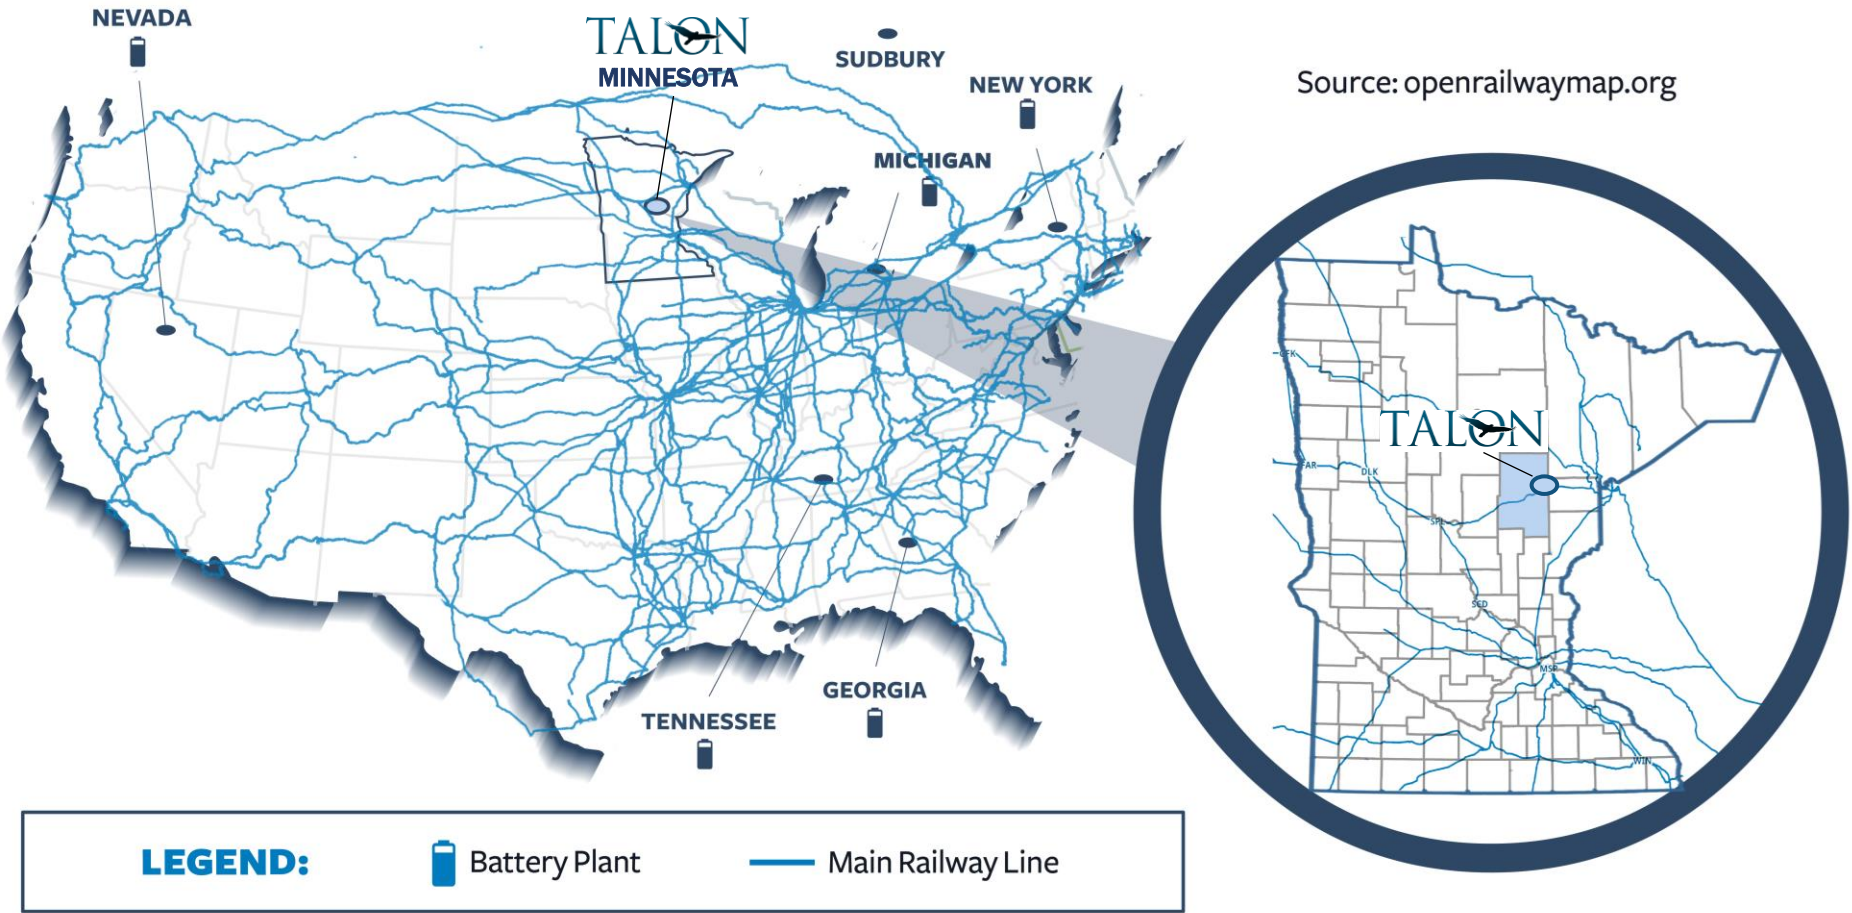

EAGLE NICKEL-COPPER MINE, MICHIGAN
EXPECTED TO CLOSE IN 2026
WHEN A GLOBAL NICKEL DEFICIT IS EXPECTED

ONLY ONE* USA NICKEL PROJECT REMAINS: TAMARACK, MINNESOTA

THE TAMARACK HIGH GRADE NICKEL PROJECT 54 MILES WEST OF DULUTH, MINNESOTA

*High-grade nickel on infrastructure that can produce Green Nickel™ for batteries the SMART way

WHAT WE HAVE, HERE, IN THE USA, TODAY:

ONE REMAINING, UNDEVELOPED HIGH-GRADE NICKEL PROJECT ON INFRASTRUCTURE

If the Tamarack Nickel Project was in production in 2020, it could have produced all the nickel that was used in plug-in electric vehicles sold across the United States

We already have:

Tamarack North Project NI 43-101 Mineral Resource Estimate (Effective Date: January 8, 2021)*

	Classification	%Ni Cut-Off	Tonnes (000)	Ni (%)	Cu (%)	Co (%)	Pt (g/t)	Pd (g/t)	Au (g/t)	NiEq (%)
Total	Indicated Resource	0.5	3,926	1.91	1.02	0.05	0.41	0.26	0.20	2.62
Total	Inferred Resource	0.5	7,163	1.11	0.68	0.03	0.26	0.16	0.14	1.57

**Estimate basis:*

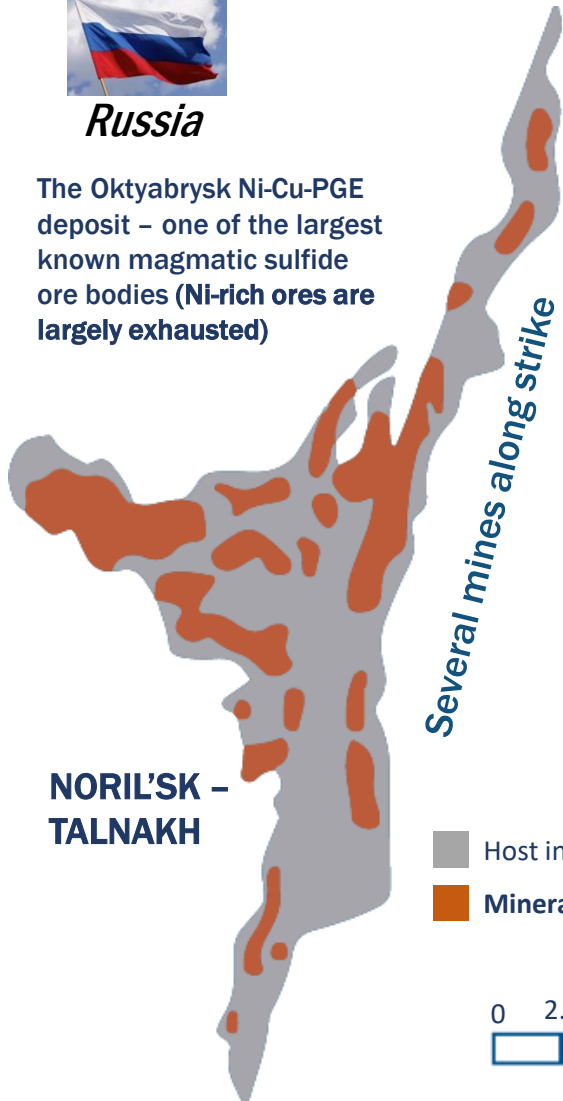

0.5% Ni cut-off.
No modifying factors have been applied to the estimates.
Tonnage estimates are rounded to the nearest 1,000 tonnes.
Metallurgical recovery factored into the reporting cut-off.
NiEq grade based on base case metal prices of \$8.00/lb Ni, \$3.00/lb Cu, \$25.00/lb Co, \$1,000/oz Pt, \$1,000/oz Pd and \$1,300/oz Au using the following formula: $NiEq\% = Ni\% + Cu\% \times \$3.00/\$8.00 + Co\% \times \$25.00/\$8.00 + Pt [g/t]/31.103 \times \$1,000/\$8.00/22.04 + Pd [g/t]/31.103 \times \$1,000/\$8.00/22.04 + Au [g/t]/31.103 \times \$1,300/\$8.00/22.04$. No adjustments were made for recovery or payability.

WHAT WE ARE WORKING ON: EVIDENCE OF DISTRICT SCALE POTENTIAL

Russia

The Oktyabrysk Ni-Cu-PGE deposit – one of the largest known magmatic sulfide ore bodies (Ni-rich ores are largely exhausted)

The Tamarack Intrusive Complex (TIC) –
First discovery drill hole: 2008

USA

Resource

Tamarack North
Tamarack South

NECK Zone

Hole 16TK0236 intersected 1.1m grading 2.55% Ni, 4.32% Cu, 0.004% Co, 3.59 g/t PGE's and 0.82 g/t Au starting at 1044.45 meters
(4 km away from resource)
See the Company's press release dated November 21, 2016

264 Zone

Hole 18TK0264 intersected 0.25m grading **9.95% Ni**, 5.74% Cu at 539m **(3km away from resource)** See the Company's press release dated June 21, 2018

- **Geophysics, Drilling**

221 Zone

Hole 15TK0229 intersected 1.63m grading **9.33% Ni**, 5.14% Cu at 702m **(1.6km away from resource)** See the Company's press release dated September 1, 2015

- **Geophysics, Drilling**

Tamarack Zone

Hole 13TK0171 intersected 7.34m grading **8.3% Ni**, 2.95% Cu at 573m **(Open to the east)**

See the Company's Updated PEA of the Tamarack North Project, March 2020

- **Geophysics, Drilling**

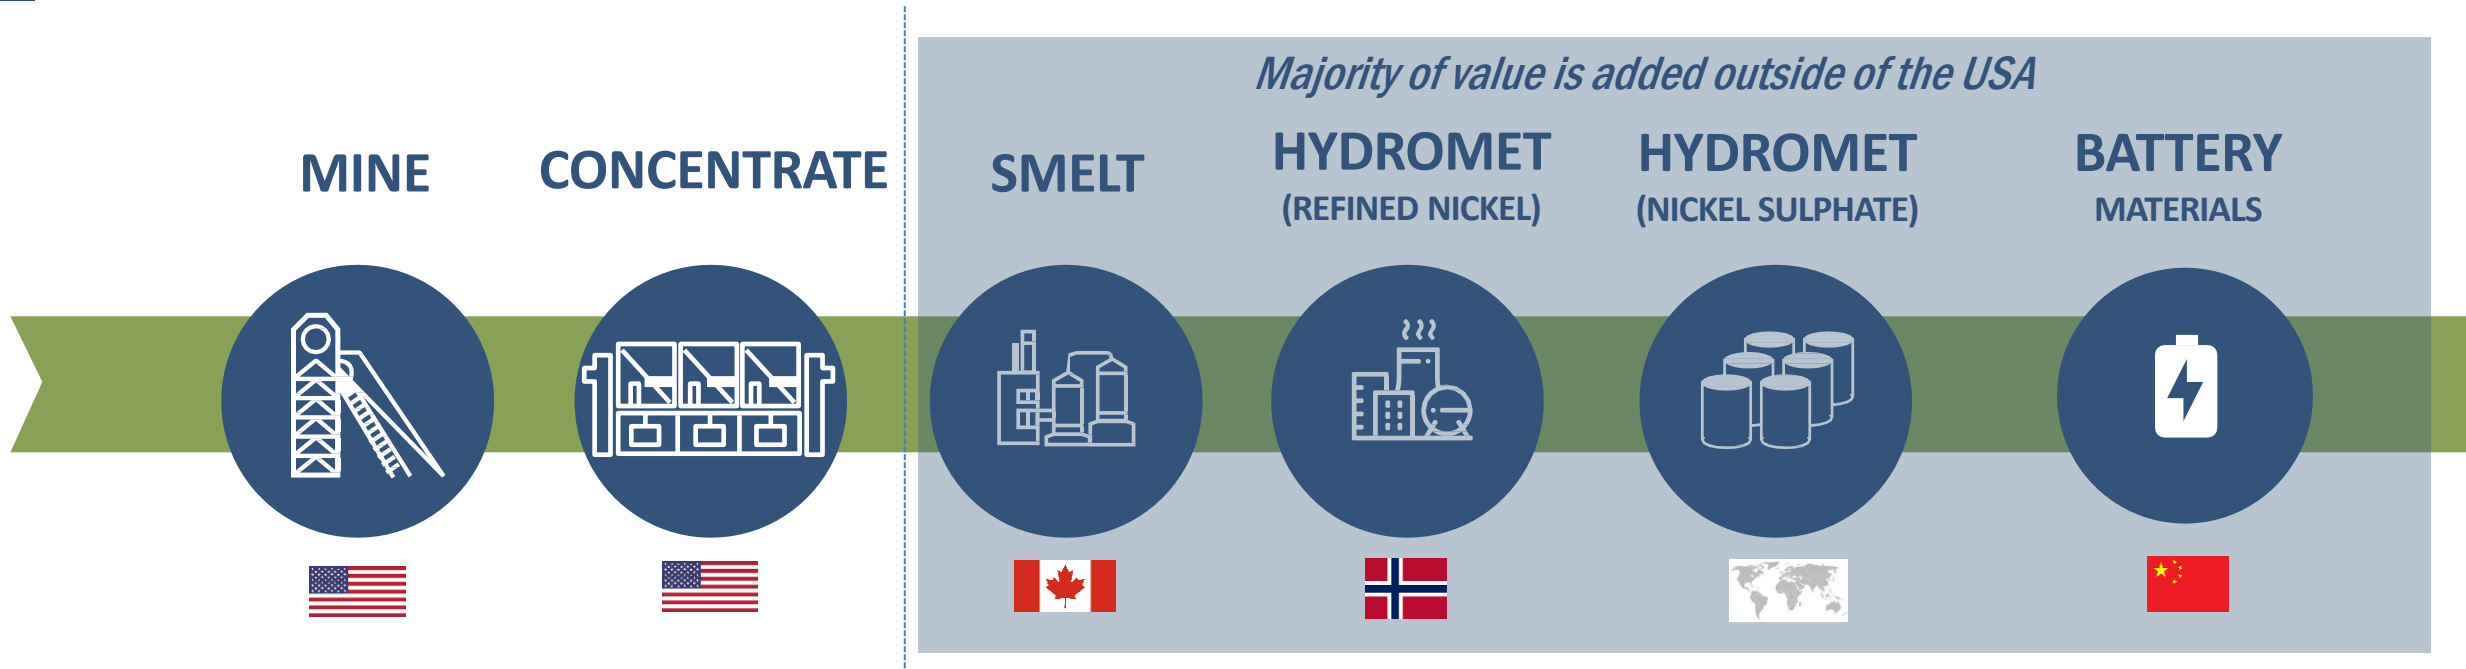

164 Zone

Hole 12TK0164 intersected 2.89m grading **3.67% Ni**, 1.97% Cu at 473m **(1.1km away from resource)**

- **Geophysics, Drilling**

WHAT WILL HAPPEN TO TAMARACK NICKEL

IF WE DON'T CREATE AN INTEGRATED GREEN NICKEL™ USA SUPPLY CHAIN

“It’s insanely complicated. It’s a small world journey of, ‘I am a nickel atom, what happens to me?’ And it is crazy. You’re going around the world three times, it’s the equivalent of digging the ditch, filling the ditch and digging the ditch again, it’s total madness basically.”

Elon Musk, Battery Day, September 22, 2020

CREATING AN INTEGRATED, GREEN SUPPLY CHAIN: OPTIONS UNDER DEVELOPMENT

Option 1: Hydromet

Option 2: From Metal to Battery

**Dual feedstock design is the subject of research and development*

LAUNCHING THE FIRST TRACEABLE, GREEN NICKEL™ SUPPLY CHAIN FROM MINE TO BATTERY – THE SMART WAY

SMALL – MINE-MANUFACTURE – ACCOUNTABLE – RESPONSIBLE – TRANSPARENT

- ✓ **S**mall footprint: HIGH-GRADE/UNDERGROUND - CAN EASILY BE CONCENTRATED WITH LOW METAL LOSSES
- ✓ **M**ine-to-manufacture: INTEGRATED NICKEL SUPPLY CHAIN FROM MINE-TO-BATTERY
- ✓ **A**ccountable: REDUCE GLOBAL WARMING POTENTIAL AT EACH STEP IN THE PROCESS FROM THE MINE THROUGH TO THE BATTERY, NOT JUST AT THE MINE
- ✓ **R**esponsible: PRODUCE NICKEL FROM 100% GREEN POWER, WITH AN ELECTRIC MINE FLEET, NO TAILINGS DAM AND A FOCUS ON CARBON CAPTURE AND STORAGE
- ✓ **T**ransparent: WE ARE CREATING BATTERY NICKEL'S FIRST TRANSPARENT AND TRACEABLE SUPPLY CHAIN FROM THE MINE THROUGH TO THE EV CUSTOMER
