

**Position:** Entry Level Geotechnical Geologist

**Location:** Tamarack, MN

**Position Type:** Permanent

**Schedule:** Full-time

**Start date:** ASAP

**Contact:** Alta at HR@talonmetals.com

## **The Opportunity**

Talon Metals Corp is recruiting for an entry level Geotechnical Geologist to join the Tamarack team in Tamarack Minnesota. The Tamarack Project is focused on developing high grade nickel sulphide mineralization to supply nickel for electric vehicle batteries.

## **What the role entails**

This is a great opportunity for a Geotechnical Geologist to work with the Tamarack team of Geologists to obtain geotechnical information of drilling core, critical for mine design regarding the stability of the rock mass. Geotechnical information logging is a complex task and the Geologist should demonstrate the ability to pay attention to detail.

Reporting to the Head of Exploration duties include, but are not limited to:

- Follow and uphold company policies and procedures including health, safety, and environmental regulations throughout all assigned tasks.
- Prepare core for logging, washing core, measuring meter marks, logging RQD
- Sampling drill core and shipment of samples.
- Drill core cutting.
- Field work
- Willing and able to complete other tasks as instructed.

## **What you will need for this role**

- Bachelor of Science in Geology
- 0-1 years of related work experience
- Motivated to work in exploration/mining
- Motivated to learn new skills and competencies
- Be able to lift and carry 50 pounds or more core boxes and sampling bags.
- Be able to stand for extended periods of time throughout the day.
- Have a Valid Driver's License with a clean driving record
- Valid First Aid certification recommended
- Enjoy working in a team, but can work independently
- Willing to relocate to be within daily commuting distance of the Tamarack Project
